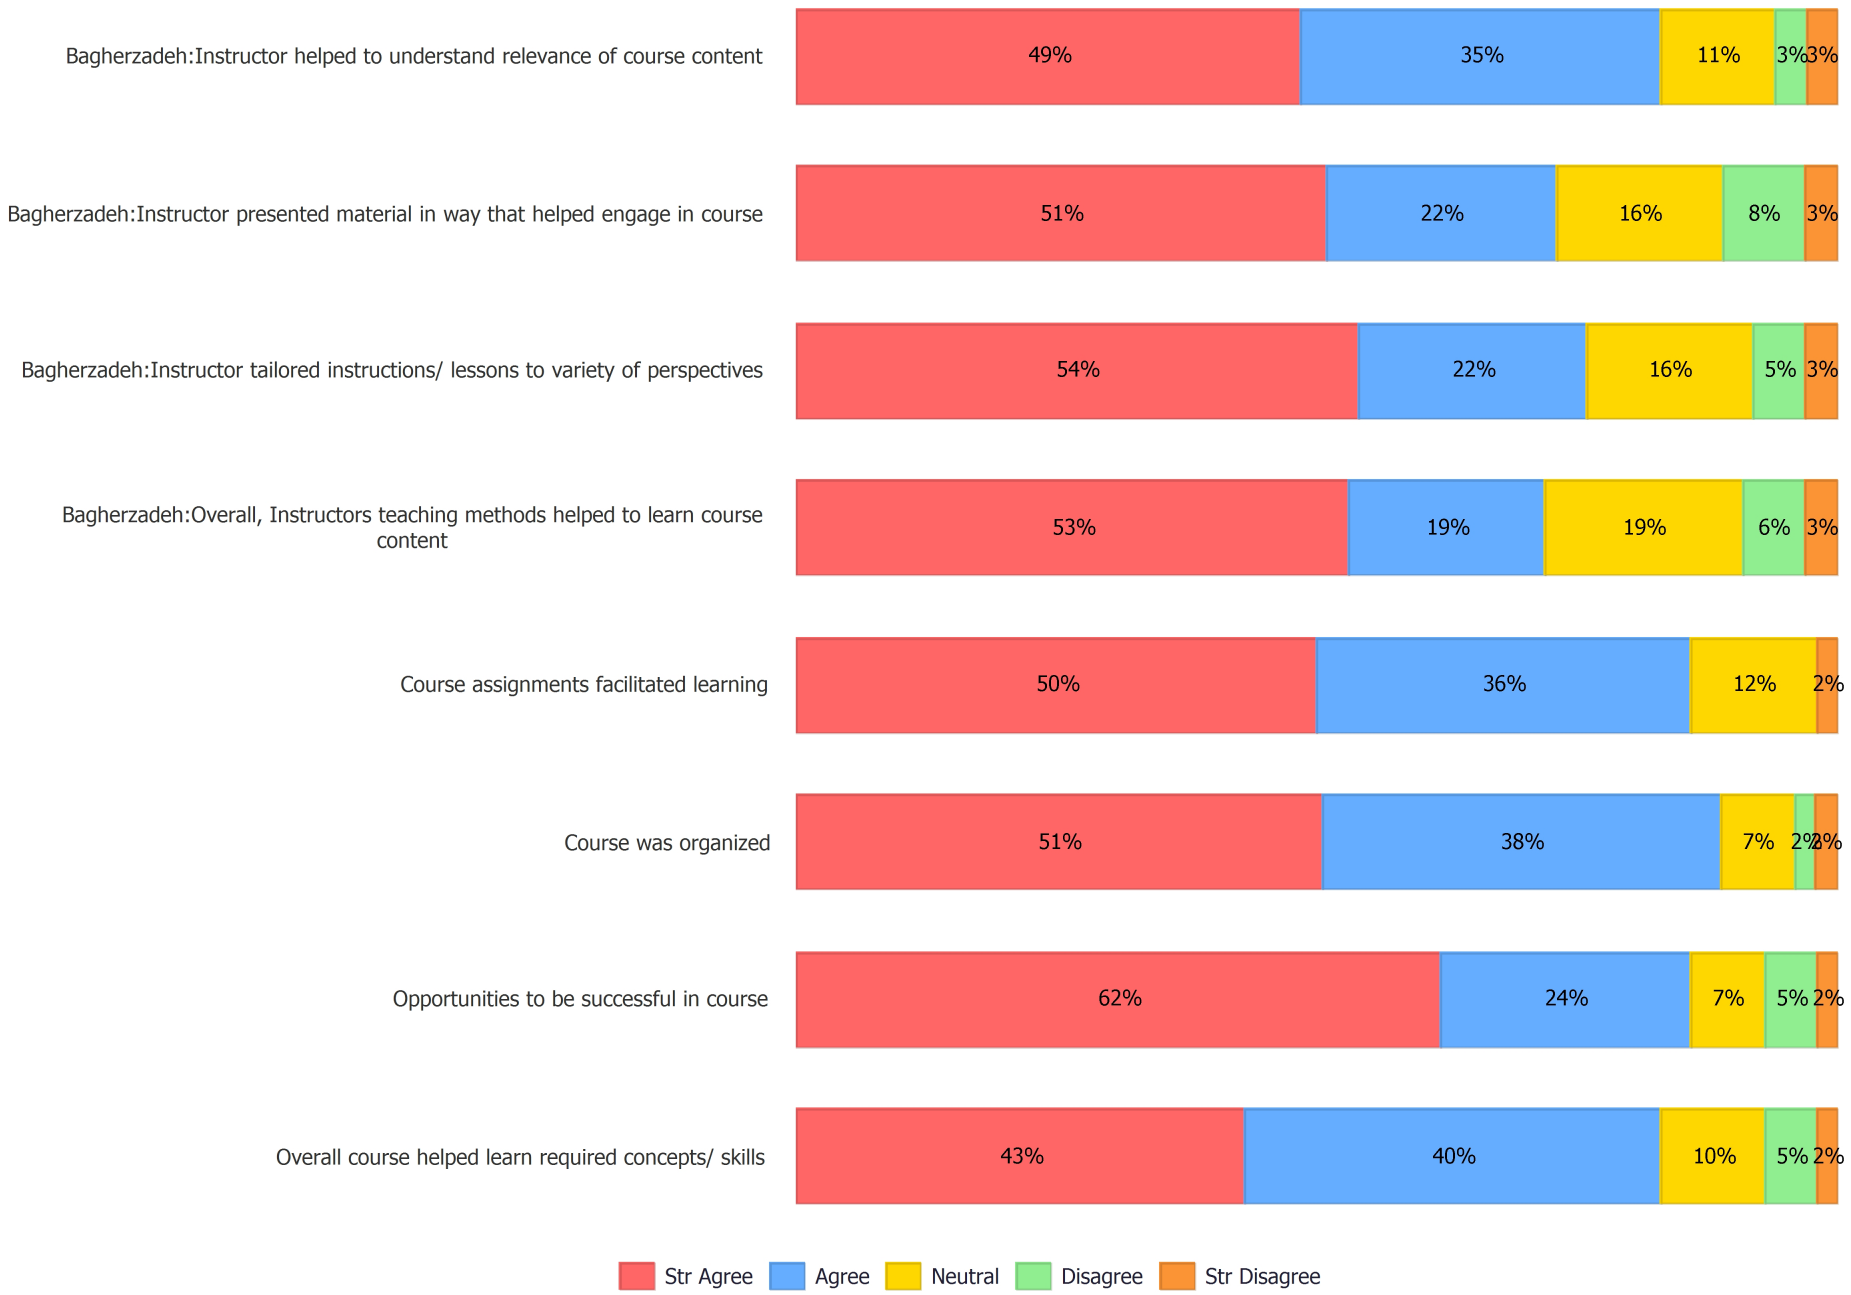
Jalal Bagherzadeh Teaching ECO ECO 2305 Undergraduate Principles Of Economics LEC FACE sec: 2 2024 Fall



Text Responses Most effective learning aspects of course
Went into details with the lesson plan. Made sure students were on track of the lesson and made it very simple to understand what he was teaching.
It was very hands on and the lectures were very informative and easy to understand
The learning catalitics help me put what I’m learning into practice
Pearson
The grading. It helped ease my nerves about the class
The professor took the time to help me outside of class when I wasn’t understanding the material.
Overall, th reviews were super helpful for upcoming exams and the slideshows were good for homework
the practice exams were close to real exams so that helped witht he tests alot
The explanation he gives were understandable for the concepts I didn’t fully grasp.
Guest speakers. They provide real world examples.
The homework's and in class activities helped me to be effective in learning.
na
During class we had live pearson sessions. Although some might find it annoying, i think they are very helpful in learning the course material. This is because it gives us the opportunity to attempt the work ourselves and then get help/directions from the instructor in the same time frame.
I thought the practice exams were very helpful
Homeworks were essential in understanding the material and I enjoyed this about the course.
The thorough explanations given in class and in the assignments.
Professor Jalal provided many resources to be SUCESSFUL in the class such as officer hours and on blackboard
literally nothing it was just word dump in class then thrown to the fire with exams and the homework's
The learning catalytics were extremely helpful
Definitely the Pearson assignment, I like how I can also go back and look them
The most affective was the Pearson and the slides I was able to go back and look at
I enjoyed as well as think that the little quizzes we would do in class helped a lot. Just a little bit of interaction goes a long way.
The slides she had organized were very helpful and she presented them so well.
The homework.
I thought how the teacher did visual examples helped greatly while at the same time going through quizzes with the class. It made it very easy to follow along and learn the material.

The most effective aspect was the instructor always did these learning catalytics to give us some example problems and if we didn't understand them he would help us and walk us through how to solve them.
Talking about the course material before tests to better understand the concepts.
The learning questions
Least effective learning aspects of course
I think that everything we did in this course was effective to my success
When the professor goes into long explanations that just circle around
N/A
N/a
I think the lecture slides didn’t do much because the professor explained everything in class on the chalk board
No complaints overall
N/A
Her using diddy and kanye west as examples
I believe the PowerPoint were not very helpful when it came to re-learning independently. they missed key information from the class lectures.
Same method of material explanation made the class less engaging
N/A!
I wished that the practice exams were posted sooner so I had more time to study it. Other than that I enjoyed this class.
There is a lot of information, and sometimes if you don't understand homeworks, you will be greatly behind.
Combining 2 different topics. Making it difficult to fully understand both.
N/a
class wasn't organized studied what was given and still don't understand anything
N/a
Quizzes, cause I would always forget it and the question
I didn’t like learning catalyst I always had trouble logging in and was confused about when to answer the questions probably got counted absent more then I actually was absent so I didn’t like that for attendance
I thought this course was taught very well and effectively
N/A
The least effective aspect was I struggled to understand the instructor sometimes because he has such a thick accent and that just made it difficult for m to grasp information.
Maybe take more time in explaining the question that we were going over
speaking straight from the slides on just reading the slides only
Additional comments about instructor

Great instructor! Just needs to be a little more mean to get students to answer to his questions in class :)
I really enjoyed this course and learned a lot!!!
He was very helpful when taking the time to teach outside of the classroom
Really good in explaining the material and providing a good course for the semester
N/A
Maybe wear a microphone during lecture to better understand and hear. Though your class was very help and easy to understand with the way you taught
N/A
Bagherzadeh always started class by asking about our week/end. He always asks for our input and understanding. This made me feel like he is a very student-centered professor. Very kind!
Very nice, engaging and enjoyable professor. Sometimes the content can pile up, but he stayed true and taught very well.
He’s a very understanding and patient professor
didn't make the learning stick, couldn't understand, course was made the most boring thing ever
Love that he dose a lot of bonus opportunities
I am a visual learner he is not a bad teacher I just have to learn differently then how he teaches
I enjoyed the class and thought that professor J was a great instructor. Only thing I would change is maybe adding a few more engaging activities.
N/A
I thought he did an excellent job of pacing his lectures and going over previous examples in a way that didn't seem repetitive.
The instructor was always prepared when he came to class and he also did a good job at involving the students in questions.
Have a great holiday
