## Text Responses

### Most effective learning aspects of course

Professor Jalal did an amazing job at explaining things and helping us engage in the lectures.

The homework's were very helpful with getting more practice over the concepts that were gonna be on the tests

In class works were very effective and helped me learn a lot. Also writing on the board helps a lot when hard to understand in my opinion.

The most effective would be the homework and reviews.

The professor is very into making sure everyone understands.

it gave me a better understanding of economics

The powerpoints and board really helped

In class work

the most effective aspects were using the in class homework questions

his way of teaching

I believe the homework's and practice test facilitated me to be able to learn the concepts thoroughly

The most effective aspects were homework and the lectures. I got plenty of good practice from the homework and the lectures were interactive as he did practice problems with us on the chalkboard.

The practice question on Learning Catalytics.

In class practice

I think the practice was the most effective aspect of the course because it allowed me to apply my learning on my own before tests. It prepared me and the reviews always were a big help to answering my questions.

I liked the practice tests because they really help in terms of studying and preparing for the exams. Also the learning catalytics that we do in class.

The homework and practice tests really were effective to the success on exams. The teacher did well at organizing the class.

### Least effective learning aspects of course

II don't think was much downside to this course as long as you attended

I think everything we did helped me be successful in the class

Least effective learning is the homeworks becuase kids use chat gpt but it's inevitable at this point.

N/A

Nothing

the least effective was the homework

put students more on the spot by asking them questions

Lectures were sometime boring and hard to follow

The least effective would be the textbook notes as the textbook PowerPoint had too much to read and write on each slide

The uncomfortable chairs in Holden Hall.

none

I think sitting far away is least effective I found myself to retain more information when I sat closer in lecture

I would say not anything really. everything we learn in class has value.

I don't think anything wasn't effective.

#### Additional comments about instructor

I think he cares deeply about his students and actually wants them to learn, contrary to other professors at the school. I appreciated his class although I seemed to struggle.

He was a great professor and it felt like he knew what he was talking about and the way to teach it to the students.

Your teaching was really helpful and help me understand concepts. Overall keep up the great work!!

N/A

In this lecture I wish he would go over more instead of just the chapters plus the chapters had around 40-60 slides I liked how he would help us out with extra points test were a little hard

He was great!

none

Thanks professor

Nice and most understanding professor I've ever had! Responds quickly to emails and easy to understand. Good lectures and good coverage on all course topics.

great

Good and fair instructor who I respected and was fully engaged with the class

He does not have perfect English and sometimes he goes a little quiet so it's hard to hear what he says. But he is a great teacher and a super nice guy.

Very nice instructor. Gave lots of opportunities for us to succeed and organized the class very well.
